

# The CNM Project : Contournement Nîmes – Montpellier

Hérault

# Loss-gain calculations for the Little bustard

≡ 2,5 units/ha

≡ 1 units/ha

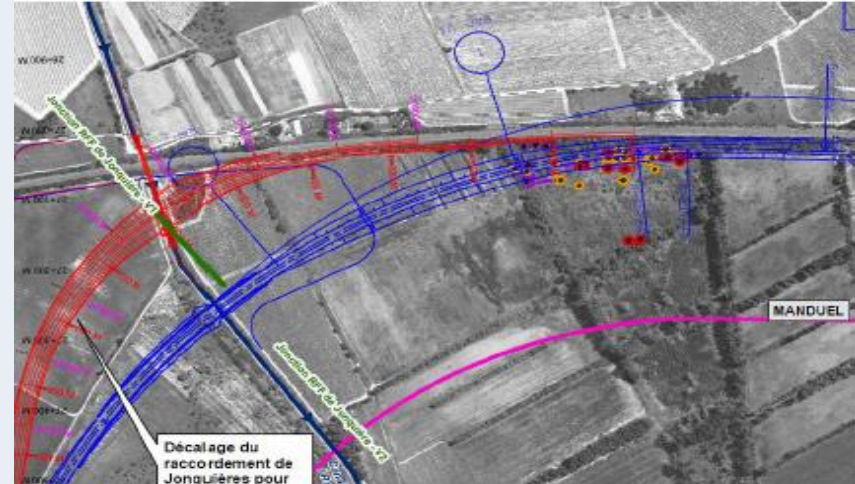

## BBOP Principles

## CNM

1. Adherence to the Mitigation hierarchy

French regulation imposes to Avoid/Reduce/Compensate impact

2. Limits to what can be offset

3. Landscape Context

Defining habitat suitability,  
Designating areas for offsets

4. No net loss

French regulation : derogation to species protection is conditionnal to achieving no net loss

5. Additionnal Conservation Outcomes

Offset program will contribute to awarness to biodiversity conservation and several actions will be implemented in addition to offset measures

6. Stakeholder participation

Over 10 local actors are involved in the implementation and management of the offset program

7. Equity

Offset program implementation is based on a analysis of others use of lands
